Frameless Multi-functional Wiper Blade

DR-661

Size: 11" (275mm) – 28" (770mm)

Wiper blade with Steel Spring Backing, Metal Bracket with plastic cap.

Aerodynamic design especially designed for countries with Heavy Rain & Snow.

Two spring-loaded rails distribute the contact pressure evenly over the entire length of the wiper blade. This further improves wiping results even at higher speeds

- Minimum wiper-induced wind noise thanks to reduction in aerodynamically exposed surface area
- Improved winter performance, with no ice formation on joints and metal frames

High Quality Natural Rubber Strip with anti-ozon feature and can work in extreme high and low temperature.

Multi-functional 3 adaptors for all types of cars.

Anti-Scratch Ability.

Frameless Universal and Multi-Functional Wiper Blade

DR-662

Size: 11" (275mm) – 28" (770mm)

Two spring-loaded rails distribute the contact pressure evenly over the entire length of the wiper blade. This further improves wiping results even at higher speeds

Balanced force distribution and optimal aerodynamics to clear every portion of the swept range with unexcelled efficiency

- Minimum wiper-induced wind noise thanks to reduction in aerodynamically exposed surface area
- Improved winter performance, with no ice formation on joints and metal frames

Aerodynamic design especially designed for countries with Heavy Rains & Snow.

High Quality Natural Rubber Strip with anti-ozon feature and can work in extreme high and low temperature.

Multi-functional 3 adaptors for all types of cars.

Anti-Scratch Ability.

Frameless Flexible Wiper Blade

DR-730

Size: 11" (275mm) – 28" (770mm)

Rubber strip is made from pure natural rubber which has anti-ozon feature and can work in extreme high & low temperature.

Smart Wiper Design which can work perfectly under heavy rain, wind and high speed car.

Two spring-loaded rails distribute the contact pressure evenly over the entire length of the wiper blade. This further improves wiping results even at higher speeds

Balanced force distribution and optimal aerodynamics to clear every portion of the swept range with unexcelled efficiency

- Minimum wiper-induced wind noise thanks to reduction in aerodynamically exposed surface area
- Improved winter performance, with no ice formation on joints and metal frames

With 4 Universal, Multi-functioning and easy assembling adaptors.

Anti-scratch, Covered with triangle coat.

Connector Material: PC

Frameless Economical Wiper Blade

DR-850

Size: 11" (275mm) – 28" (770mm)

Fast Moving, Economical cost, suitable for Eastern Europe & Middle East Countries.

High Quality Natural Rubber Strip which work in extreme high and low temperature.

Anti-Scratch Ability.

With One Adaptor.

Frameless Snow Wiper Blade

DR-920

Size: 11" (275mm) – 28" (770mm)

Wiper Blade for cold weather enduring low temperature, suitable for Countries with Cold Climate.

Two spring-loaded rails distribute the contact pressure evenly over the entire length of the wiper blade. This further improves wiping results even at higher speeds

- Minimum wiper-induced wind noise thanks to reduction in aerodynamically exposed surface area
- Improved winter performance, with no ice formation on joints and metal frames
- Balanced force distribution and optimal aerodynamics to clear every portion of the swept range with unexcelled efficiency

Flexible soft layer reduces chatter & wipes quietly with less noise than conventional wiper blades.

Smart Wiper Design which can work perfectly under heavy snow, rain, wind and high speed car.

Natural Rubber element for free wiping in both directions.

Anti-Scratch Ability.

With One Adaptor

Frameless Universal Wiper Blade

DR-980

Size: 11" (275mm) – 28" (770mm)

All season performance, Evenly Balance.

Aerodynamic design which can work perfectly under heavy rain, wind and high speed car.

With 9 Universal, Multi-functioning and easy assembling adaptors.

Wiper blade with Steel Spring Backing, Metal Bracket with plastic cap

Two spring-loaded rails distribute the contact pressure evenly over the entire length of the wiper blade. This further improves wiping results even at higher speeds

Balanced force distribution and optimal aerodynamics to clear every portion of the swept range with unexcelled efficiency
